## **Tree Management Policy** **Adopted on: 6.10.2022**

### **AIMS**

To value trees for the significant contribution they make to wellbeing and quality of life within the area. Trees are managed to promote biodiversity, climate mitigation, and visual amenity whilst being managed and maintained in a way which promotes their safety and health.

### **INTRODUCTION**

The Parish Council has a responsibility to ensure the Council's tree stock is regularly inspected and managed to ensure public safety and to minimise risk to property in particular in areas where the public may walk or sit beneath trees. The Parish Council does this with the following objectives in mind:

- Ensure tree stock is maintained in a cost effective manner, maximising visual amenity and associated environmental benefits whilst minimising risks to public safety and property.
- Ensure that the work undertaken on Parish Council trees is done to a high standard, is appropriate and in line with best arboricultural practice.
- Ensure appropriate management of trees which are important for biodiversity, as wildlife corridors or as landscape features.
- Promote the positive contribution made by trees to open spaces, including the value which they have for wildlife.
- Identify opportunities for appropriate tree planting schemes including community orchards.

### **TREE INSPECTIONS**

The Parish Council's tree stock will be visually inspected by a qualified arboriculturalist every year depending on the location and risk assessment. The Parish Council also conducts its own routine periodic visual assessment for dead branches, plus additional checks are carried out after periods of bad weather to identify damaged trees. The Parish Clerk retains records of the safety checks.

The Parish Council will respond promptly to tree matters involving safety and will remove dead trees (except where biodiversity issues prevail) and dangerous and unsafe trees and branches. Trees which are in decline will be monitored in order to ensure they pose no risk to people or property.

The Parish Council will not generally prune its tree stock to alleviate the obstruction of light or telecommunication signals where branches overhang neighbouring properties.

When carrying out tree works the Parish Council will comply with all relevant legislation in respect of the protection of nesting birds and other wildlife. Only essential tree works will be carried out during the bird nesting season. Work will not be carried out on trees to address the issues of bird droppings. Prior to works being carried out on a mature tree the potential for bat roosts will be assessed. If it is found that there are features within the tree that are likely to be suitable for bat roosts, a survey will be carried. If bat roosts are found to be present appropriate mitigation measures will be implemented before any work takes place.

The Parish Council will work with partners and community groups to identify opportunities to increase its tree stock through appropriate tree planting.

There will be a presumption against removal of existing trees and where this is necessary replacement in the same location, or if this is not possible in another more suitable location, will be considered.

The Parish Council will consider planting new, species rich, native woodlands in appropriate locations to meet a variety of objectives, including habitat creation, the screening of unsightly development, the provision of shelter and the enhancement of the landscape.

Veteran trees will be managed in a way that preserves their unique characteristics. When managing trees and woodlands, consideration will be given to biodiversity issues in line with the Biodiversity Duty for Public Authorities enshrined in the Natural Environment and Rural Communities Act.

In planting or adopting trees or tree belts, the Parish Council will give consideration to the potential for damage or inconvenience, or the impeding of access, as the trees mature.

Adequate resources will be made available in order to ensure that the Parish Council complies with its duty of care in respect of tree safety.

All tree works carried out on behalf of the Parish Council will comply with appropriate Standards and Legislation in respect of tree protection, and will be undertaken by competent and qualified contractors. No tree works would be considered which did not comply with BS 3998: 2010.

This policy will be reviewed annually, or when there are major changes to legislation or best practice in respect of tree management.
